

DIY Bathroom Cleaner

Ingredients:

- 2 tbsp. liquid castile soap (preferably unscented)
- 1½ tbsp. baking soda
- 20 drops of tea tree essential oil
- 15 drops lemon essential oil
- 10 drops lemongrass oil or citrus oil of choice
- 2 cups distilled water

Instructions:

1. In a glass bowl or measuring cup mix together the liquid soap, baking soda and essential oils.
2. Add the distilled water and stir well to combine.
3. Store in a glass spray bottle*.

Tip: For different scent profiles vary the type of citrus oils used; choose from lime, tangerine, sweet orange, bitter orange, bergamot, grapefruit, etc. You could also add a bit of peppermint or spearmint. Be creative!

**Essential oils do not react well with plastic. Also, glass is healthier for you and the environment.*
